Job experience

05/28/2024 - Current
Junior Developer, Case-Mate
At Case-Mate, I develop and optimize web solutions to support business operations. I have built a user-friendly WordPress website tailored to internal and client needs. I also manage integrations and workflows using NetSuite and Celigo, leveraging APIs to ensure seamless data flow. Working with HTML, CSS, JavaScript, and JSON, I build, customize, and enhance web solutions. Collaborating with senior developers, I contribute to process automation and system improvements to drive efficiency. While my primary focus is development, I assist the IT team when needed to support technical operations.

02/07/2022 - 03/20/2023
Certified Medical Assistant, Wellstar Douglasville Medical Center
Supported multiple physicians by managing patient check-ins, recording vital signs, and updating medical records using the Wellstar system. Assisted with treatments, follow-up care, and patient communications, including lab results and medication requests. Maintained daily logs and documentation. Trained new staff on clinic procedures and computer systems.

April 2024

W3Schools CSS Developer

January 2024

W3Schools JavaScript Developer

July 2023

W3Schools HTML Developer

May 2023

Google IT Support Professional Certificate

Projects

Construction United Services – Website Update (February 2025)

I recently revamped the [Construction United Services website](), giving it a more modern and polished look while maintaining its original structure. The project involved updating images, refining the layout, and improving the overall user experience. Using WordPress, along with HTML, CSS, and basic JavaScript, I ensured the site remained functional, visually appealing, and easy to navigate.

Personal Portfolio Website

You can view my personal portfolio [here]() that I designed from beginning to end by myself and have hosted with the help of Github.

Shopify store

I utilized Shopify to gain hands-on experience in various functions of the platform.

- Demonstrated proficiency in setting up and managing product listings, inventory tracking, and order processing within the Shopify environment.
- Developed a keen understanding of Shopify's backend functionalities, including theme customization, payment gateways, and shipping configurations.
- Implemented effective strategies to enhance the online shopping experience for customers through Shopify's features.

Remote Work Setup

Home Office Environment:

- Equipped with a MacBook laptop, high-resolution monitor, and ergonomic desk setup for optimal productivity.
- Configured a private and quiet working area, minimizing distractions and ensuring a conducive environment for focused work.
